A rectangular raised pond made of light-colored wooden planks, filled with water and containing several tall grasses. The pond is situated on a grey stone patio in a garden with various plants and trees in the background. A circular gold callout bubble is positioned in the upper right corner of the image.

NO HEAVY  
LIFTING OR  
POWER TOOLS

# Building a pond has never been easier!

WoodBlocX above-ground ponds are easy to construct, and require no heavy lifting or power tools to build.

There's no need to dig a hole as our award-winning timber system can be built on both soft and hard ground types including grass, soil, paving, decking and patios.

**We only supply the raised pond structure and PVC pond liner.**

We do not sell filtering systems, overflow equipment, water pumps, pond spouts or waterfalls. We know every pond is different so we leave these choices up to you.

Made from sustainable treated timber, our ponds are built to last. Every raised pond kit includes simple layer-by-layer building instructions to follow - all the components are cut to size!

We offer two raised pond types: **single and double wall designs.**

**We sell a flexible PVC pond liner**

# Raised pond types

WoodBlocX raised ponds are available in two styles and can be built on soft and hard ground.

SQUARE &  
RECTANGLE  
DESIGNS ONLY

## Single wall designs (small)

Single wall raised ponds are a naturally beautiful addition to any garden and are our most affordable and popular pond style.

Due to water pressure restrictions, single wall ponds have a **maximum size of 1.875m width x 1.875m length x 0.65m in height.**

## Double wall designs (large)

Double wall raised ponds give you the opportunity to create a larger pond but are **designed with a surrounding planter** (minimum 75cm width) for added support.

You can customise the height of the pond and planter sections to suit your needs but these kits are considerably more expensive vs our single wall option.

WoodBlocX

Pond designs can be adapted to include planters, walls or space for a water spout / waterfall - please use our [Free Design Service](#).

# Pond liners

We offer two pond liner options or you can source your own.

## PVC liner

Heavy-duty [PVC pond liner](#) that ensures your WoodBlocX structure can safely hold water to create a raised pond.

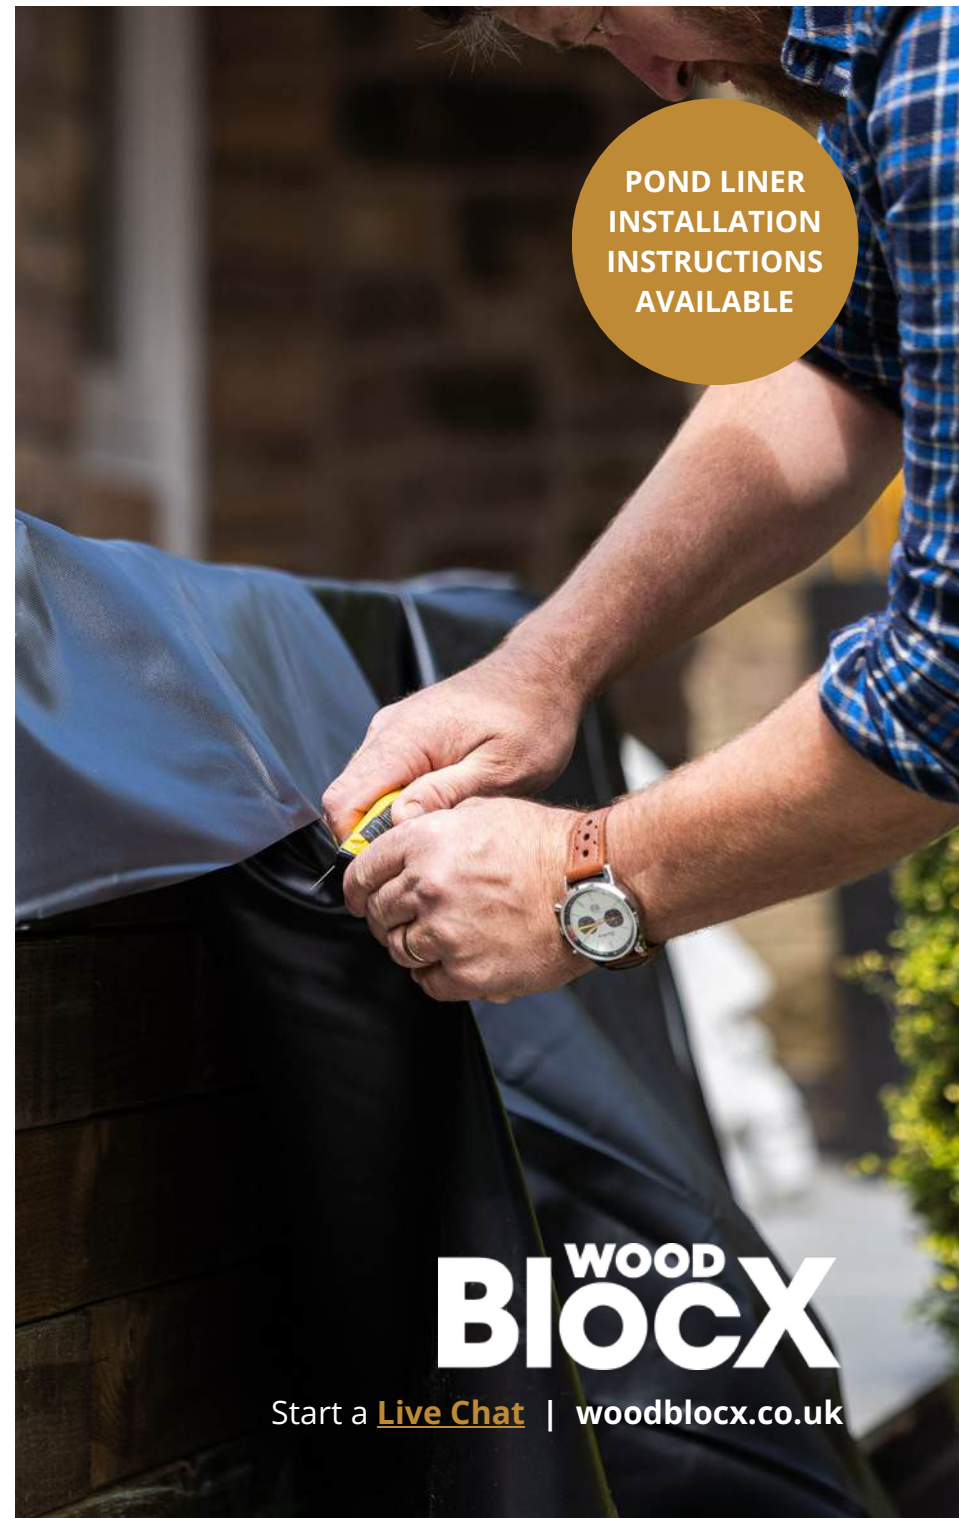

- Arrives with your WoodBlocX kit
- 4 x 4 metre sheet (16m<sup>2</sup>) - one-size only
- Must be cut to size using a sharp craft knife
- **Suitable for ponds up to max size: 1.875 x 1.875m x 0.65m**
- 0.5mm thick liner with good flexibility

## Box welded liner

Bespoke quotes available on request. Custom-made to fit your pond size, welded at the joints to stop creases and folds.

- Shipped from another supplier
- No need for cutting or trimming
- Considerably more expensive vs our PVC-sheet liner
- Made from flexible PVC material
- Suitable for large WoodBlocX ponds
