WOOD BlocX

Thank you for your interest in WoodBlocX raised ponds. Our proven award winning system gives you the ability to choose between single and double walled ponds.

There's no need to dig a hole unless you are looking for extra depth and, because the ponds are above-ground, they can be placed on any surface, including paving and concrete.

"Love the product. Staff very helpful. Easy to construct with clear instructions."

David Wright

"Excellent product - well designed. Love the kit - it really works."

Sam Duncan

"Good instructions and advice. Excellent product which was precision made."

James Dowling

"Great delivery service and the product is fantastic. Will definitely order again"

Marie-Louise Dodds

WHY CHOOSE WOODBLOCX FOR MY RAISED POND?

WoodBlocX ponds are easy to construct, and require no heavy lifting or power tools to build.

Made from sustainable timber.

WoodBlocX are designed and manufactured to last for 15 years and are suitable for sitting on any surface.

Once your order has been finalised we aim to have it delivered with 3-4 working days.

SINGLE SKIN PONDS

Single skin ponds are our cheaper option but are limited in size due to their capacity to cope with the water pressure.

We must stick to our standard sizes as this gives the greatest strength to our ponds. Our standard sizes are based on 375mm (14") increments.

The maximum dimensions for a single skin pond is 1875 x 1875 x 650 mm (6'2" x 6'2" x 2').

PRICES START FROM £120.00

DOUBLE SKIN PONDS

Double skin ponds are the largest in our range.

These ponds can be built to any size and can go up to 850 mm (2ft 9") in height.

The inner skin is 750mm smaller than the outer.

You can choose to have the separate skins at different heights to suit your needs.

Double skin ponds give the opportunity to have a separate planting area surrounding your pond.

POND LINERS

WoodBlocX offer two options for pond liners which are sold separately.

Option 1

- WoodBlocX PVC pond liner
- Liner will only fit our smaller ponds under 2m in size.
- Our heavy duty PVC is a tougher and thicker material than standard PVC
- Maintains its flexibility
- Delivered with your WoodBlocX

Option 2

- WoodBlocX made to measure liners
- Liner custom made to fit any size pond
- Choose between Butyl and EPDM
- Delivered separately but should arrive on the same date as your WoodBlocX delivery

HOW TO BUILD OUR PONDS

The key with any WoodBlocX build is to get the foundations level before you start. This allows you to easily build the layers of WoodBlocX as per your unique instruction pack (supplied with every kit).

With a pond it's a good idea to pad the base of your build with carpet or sand to remove any sharp angles which could cause dirt build up. Next, ensure that the liner is fitted over the dowels, making a cross to allow the dowel through the pond liner. Finally, hook the liner to the top of the BlocX's prior to fitting the capping.
